

PRIMUS

Across the country and across generations, PRIMUS delivers solutions that power businesses, government, education, and research, connecting individuals and entire communities.

Primus is your single-source expert in the planning, design, and construction of high-performing, cost-efficient communications solutions.

TOWERS / WIRELESS INFRASTRUCTURE

Primus provides a complete supply chain of tower equipment which allows citizens, businesses, and government to access information that is essential to the well-being and productivity of all.

DISTRIBUTED ANTENNA SYSTEMS (DAS)

The public's enjoyment of cultural, entertainment, and sporting events is heightened with unlimited access to reliable communications. Primus' DAS technologies help you stay connected with solutions that deliver coverage and capacity with reliable wireless service in challenging environments.

LAND MOBILE RADIO

From first responders to dispatched services with large vehicle fleets, Primus helps power your land mobile radio system with interoperability solutions that allow seamless communication between all units and those in need of assistance.

PUBLIC SAFETY

Primus works with Planning and IT officials with federal, state, and local governments from design through installation and operation so that key officials and departments experience totally reliable connectivity. These solutions create a better informed public and improved security through early warnings, public alerts, and disaster preparedness.

UTILITIES / OIL AND GAS

An informed investment in telecom helps pave the way for next-generation energy solutions. Whether the need is for a custom-designed or in-stock configuration, Primus provides the communications infrastructure that enables utilities to better monitor and control the production and delivery of power, gas, and electricity.

TRANSPORTATION

Travelers have spoken: they want total connectivity at all times. Wi-Fi services and a power outlet at every seat can increase ridership. The wide-ranging telecom solutions available from Primus meet the demands of consumers and also keep dispatchers connected to the trains, buses, trucks, and ships that transport people and cargo and foster economic growth.

EDUCATION

High-speed connectivity can increase enrollment through greater access to courses and study materials. When students can use remote learning, there are fewer absences caused by illness or truancy. Primus' communication solutions let school officials communicate swiftly with students, parents, employees, and neighbors. Primus delivers solutions that facilitate instruction and help protect people, buildings, equipment, and intellectual property.

HEALTHCARE

Primus provides telecommunications solutions that enable healthcare professionals to monitor patient health remotely, prevent life-threatening events, and quickly connect with first responders.

SAFETY AND INDUSTRY TRAINING

Being safe on the job is not only a requirement, but also fundamental to completing a project on time. Primus has an extensive inventory of safety products from the highest quality manufacturers and is committed to helping customers acquire skills and competencies required to gain maximum value from product purchases and perform work safely.

The Primus logo is displayed in a bold, italicized, yellow sans-serif font.

Leading-Edge Telecommunications Solutions
Building Connectivity for Generations

PRIMUS GUARANTEE

- Expert guidance in the selection of systems for optimal performance
- Industry-leading quality, value, and on-time delivery
- A smooth procurement process
- Single-source order fulfillment—packing, site kitting, tracking, and invoicing
- Live technical support

COMPLETE SUPPLY CHAIN SOLUTIONS FOR THE MOST RELIABLE, INNOVATIVE CONFIGURATIONS

Distributed Antenna Systems (DAS)

Microwave

Towers/Site Hardware

Base Station Antennas

Mobile & Portable Antennas

Enclosures & Cable Management

Grounding & Arrestors

Cable, Connectors & Jumpers

Power Systems

Test & Measurement Equipment

Tools and Shop Supplies

Installation Supplies
